

SYMBIO launches new project website!

- Funded by the Horizon Europe Programme, SYMBIO provides European regional communities with tools and methodological approaches to developing bio-based business models.
- With a user-friendly design, the new project website will enable stakeholders to stay informed and actively participate in the project's development.

PRESS RELEASE. 24/07/2024. SYMBIO, a three-year project funded by the Horizon Europe Programme, is excited to announce the launch of its new project website (<https://www.symbioproject.eu/>), designed to provide stakeholders with comprehensive information and interactive tools for better engagement and collaboration. The brand-new webpage is part of the SYMBIO consortium's ongoing commitment to transparency, accessibility, and awareness-raising both about the European programme that supports the initiative and the mission, vision, and values of the project itself.

Key features of the new website

The webpage design, aligned with the visual identity of the project and the Horizon Europe programme's norms, boasts a modern, intuitive configuration that allows visitors to navigate with ease and find the information they need quickly thanks to a set of detailed sections on project goals, timelines, and milestones.

The new website also serves as an **official resource hub**, a centralized repository of documents, reports, and multimedia content that ensures that stakeholders have access to all relevant materials, such as other topic-related EU projects and the latest news.

Moreover, it includes feedback mechanisms, like SYMBIO **social media accounts**, and direct contact channels with the project Coordinator and the Communication manager, which are very useful for journalists if they need further details, for example.

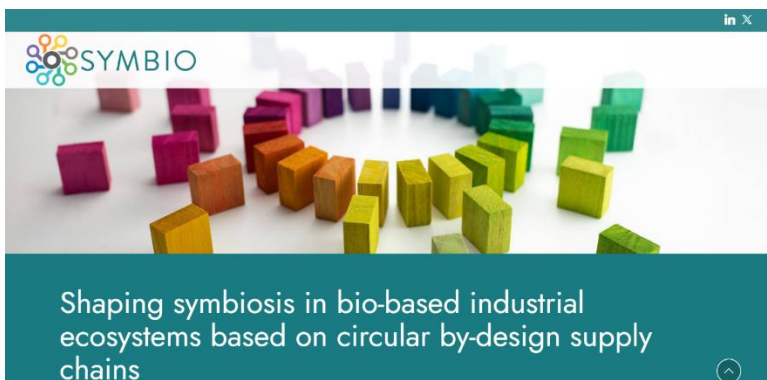

The SYMBIO partners strongly believe that providing a responsive digital platform for information and interaction, can **foster stronger relationships** and achieve greater project outcomes.

Horizon Europe

THE NEXT EU RESEARCH & INNOVATION PROGRAMME (2021 – 2027)

About SYMBIO

SYMBIO brings together eight partners from six EU countries (Italy, Austria, Slovenia, Croatia, Spain, and Belgium) committed to building bio-based business models based on circularity from the design stage and industrial symbiosis. SYMBIO's solutions enable companies to identify additional circular value from their products and materials and mitigate risks from raw material volatility, pricing, and local material supply. Thanks to industrial symbiosis approaches, more circular solutions are available to companies, ensuring wider diffusion and supporting the implementation of sustainable business practices.
